Laborator 3

Exercițiul 2

```
Exemplu de problemă în C++:
#include <iostream>
#include <string>
using namespace std;
class laptop
  public:
     string brand;
     string model;
     string culoare;
     laptop(string x, string y, string z);
};
laptop::laptop(string x, string y, string z)
  brand = x;
  model = y;
  culoare = z;
}
laptop::~laptop(){
cout<<"Obiect inexistent";</pre>
int main()
  laptop laptopObj1("Lenovo", "IdealPad3", "albastru");
```

```
cout << laptopObj1.brand << " " << laptopObj1.model << " " << laptopObj1.culoare << "
"<<endl;
  laptop laptopObj2("Asus", "M509DA-EJ025", "gri");
    cout << laptopObj2.brand << " " << laptopObj2.model << " " << laptopObj2.culoare << "
"<<endl;
  laptop laptopObj3("HP", "250G7", "negru");
    cout << laptopObj3.brand << " " << laptopObj3.model << " " << laptopObj3.culoare << "
"<<endl;
  return 0;
}
Același exemplu scris in Python:
class Laptop:
  def __init__(self, brand, model, culoare):
    self.brand = brand
    self.model = model
     self.culoare = culoare
  def seteazaBrand(self, newBrand):
         self.brand = newBrand
  def getBrand(self):
         return self.brand
  def afiseazaToateInformatiile(self):
    print('Marca: ', self.brand, '; Model: ', self.model,';','Culoare: ', self.culoare)
laptop1=Laptop('Lenovo','IdealPad3','albastru')
laptop2=Laptop('Asus','M509DA-EJ025','gri')
laptop3=Laptop('HP','250G7','negru')
laptop1.afiseazaToateInformatiile()
laptop2.afiseazaToateInformatiile()
```

```
laptop3.afiseazaToateInformatiile()
laptop1.seteazaBrand('AltLenovo')
laptop1.afiseazaToateInformatiile()
Același exemplu scris în Java:
public class laptop
              public String brand;
              public String model;
              public String culoare;
              public laptop(String x, String y, String z)
              {
                     brand = x;
                     model = y;
                     culoare = z;
              }
}
package <missing>;
public class GlobalMembers
       public static void main(String[] args)
              laptop laptopObj1 = new laptop("Lenovo", "IdealPad3", "albastru");
                     System.out.print(laptopObj1.brand);
                     System.out.print(" ");
                     System.out.print(laptopObj1.model);
                     System.out.print(" ");
                     System.out.print(laptopObj1.culoare);
                     System.out.print(" ");
                     System.out.print("\n");
              laptop laptopObj2 = new laptop("Asus", "M509DA-EJ025", "gri");
                     System.out.print(laptopObj2.brand);
                     System.out.print(" ");
                     System.out.print(laptopObj2.model);
```

```
System.out.print(" ");
System.out.print(laptopObj2.culoare);
System.out.print(" ");
System.out.print("\n");
laptop laptopObj3 = new laptop("HP", "250G7", "negru");
System.out.print(laptopObj3.brand);
System.out.print(" ");
System.out.print(laptopObj3.model);
System.out.print(" ");
System.out.print(laptopObj3.culoare);
System.out.print(" ");
System.out.print(" ");
System.out.print(" ");
System.out.print(" ");
System.out.print(" ");
```
